INTERNSHIP EXPERIENCES

Sri Eshwar College of Engineering - MERN Internship	2025
Developed a full stack E-Commerce platform implementing product listing, user authentication, and cart details. Built responsive UI with React and handled backend using MongoDB.	

PROJECTS

Username Enumeration	2025
In today's digital age, individuals often create accounts across numerous online platforms. However, verifying the online presence of a specific username across these platforms is time-consuming and manually intensive. This presents a challenge for cybersecurity analysts, digital investigators, and even everyday users who want to track username availability or identity consistency across the web.	
Retail Store Website	2025
A retail store website built using HTML, CSS, and JavaScript. HTML creates the structure of the website with products and layout. CSS adds color, style, and attractive design. JavaScript makes the site interactive and dynamic, enhancing the user experience.	
Hospital Management System	2025
A hospital management system built using Python to manage hospital operations efficiently. It helps handle patient records, doctor information, appointments, billing, and medical history. Python is used for backend logic, databases store data, and frameworks like Django power the user interface, making hospital workflows faster, more accurate, and paperless.	
EvalPro	2025
A C++ program that uses Object-Oriented Programming (OOP) principles to manage student records. It provides options to add, view, search, delete, and save/load data, demonstrating abstraction, encapsulation, inheritance, and file handling through a menu-driven interface.
